

## Towing Heads and Adapters

Caldertech's range of Towing Heads provide a quick, simple and reliable method of attaching a winch wire, or other pulling device to a plastic pipe.

Towing Heads avoid the need to cut into the pipe or the fusing of additional fittings in order to gain a pulling fixture.

All Towing Heads are reusable and based on the "Vick" expanding internal gripper design which works on the principle that the harder the pull the tighter the grip.

All models are manufactured to a high specification using good quality steels and aluminium and have undergone a comprehensive series of tensile tests to ensure that in general the pipe will fail before the Towing Head.

### FEATURES

- Simple and quick to fit and remove
- Reliable
- Zinc plated for corrosion protection
- Works over a range of SDRs
- Fully reusable
- High quality robust construction
- Size range 20 - 45mm

### Optional

- Pipe towing head adapters
